#### ***Allowable Subject Matter***

2. The following is an examiner's statement of reasons for allowance:

The examiner finds applicant's arguments persuasive.

The prior art of record fails to teach or suggest or render obvious:

A method for modeling a circuit design comprising: synthesizing a circuit design to create a first gate-level representation of the circuit design; analyzing a second gate-level representation of the circuit design to learn architecture information; and resynthesizing the first gate-level representation of the circuit design to incorporate the learned architecture information from the second gate-level representation of the circuit design, wherein the analyzing comprises a resource sharing learning, the resource sharing learning comprising: creating one or more resource pairs from sharable resources in the first gate-level representation of the circuit design for each of the one or more resource pairs, synthesizing a subcircuit that shares the resource pair; for each of the synthesized subcircuits calculating a similarity with a corresponding subcircuit in the second gate-level representation of the circuit design; and identifying the synthesized subcircuits having a high similarity with the corresponding subcircuit in the second gate-level representation of the circuit design.
